### **Analysis of Dimock well water samples**

The Region 3 Lab in Fort Meade has completed the analysis of well water samples from Dimock, Pa. Samples were analyzed for semi-volatile organics, volatile organics, metals, alcohols, glycols, anions, oil and grease, total dissolved solids and total suspended solids. The project started in February and continued into March. Here are some interesting facts on the project. 286 samples were analyzed. A total of 2110 sample containers were submitted to the laboratory. There were 99 coolers shipped and 164 pages of chain of custody records. Additional analytical support was provided by Regions 2 and 9, NAREL and several contract labs. (Stevie Wilding and Cindy Caporale, OASQA, 410-305-2606/2732)
